This is an architectural drawing of a site plan for a garage expansion project. The plan includes various elements such as existing and proposed contours, zones, utilities, and infrastructure. The site is located near the WMATA Garbage Station and includes plans for approximately 10' contour lines and 2' contour lines. Existing features include tree lines, street lights, and various utility connections such as gas, water, and electrical. Proposed features include landscaping, hardscapes, and infrastructure improvements. The project is designed to accommodate increased traffic and parking needs, with considerations for utility relocation and new planting areas. The plans are subject to photometric analysis and final approval by WMATA. The design is by LERCH, EARLY, BREWER & PERKINS EASTMAN DC, and the plans are dated January 21, 2019.
