

A **Special Protection Area Map** and **Water Quality Plan** are not required for this project. The project is not within a Special Protection Area. The City of Takoma Park is the Stormwater Management (SWM) review-approval agency for this project and has provided SWM Concept approval (SWC-10-25-20) for the proposed SWM facility (Filterra structure, or equivalent). As was the case with the New Ave Bikeway Section A (MR2021007) project, the City of Takoma Park will prepare an MOU with MDOT State Highway Administration for ownership and maintenance of proposed SWM features, as the bikeway improvements are within State right of way. The project design is also being funded through the Maryland Bikeways Program.

The SWM Concept report as approved by City of Takoma Park is also included for informational purposes only.
