PLANTING DETAIL/DECIDUOUS TREES

1. Plant Spacing
   Plant spacing is generally to scale on plan. No plants except viney ground covers or other containers removed puncture to allow root growth. Remove collar from fiber pot & nursery field grown grade. Shrubs shall bear same relation to the availability of the required plant material as specified on the Plant Materials List. Substitution shall not be made without the written approval of the Landscape Design. The Contractor shall furnish and plant all plants required to complete the work shown on the drawings. All plants shall be properly marked for identification.

2. Planting
   Plants shall be planted with the root ball or roots fully extended so that the soil level is 2" below the top of the root ball at time of planting. Backfill shall be earth and shall be homogenized. Plants shall be planted higher than surrounding grade. Shrubs will be 1" higher and trees will be 3" higher. Plants shall have vertical sides. Hedges shall be planted in a trench 12" wider; beds for mounded earth saucer. Plants shall be planted in a trench 12" wider than surrounding grade. Plants shall be staked at the time of planting. Backfill shall be compacted earthless, 1/3 of earth ball. Remove burlap from top. (3 required)

3. Plant Quality
   Plants shall be freshly dug and not less than 60". Two branches that are of equal size and of approximately the same length. All plant sizes shall average at least the middle of the range for the species. Evergreen trees are to have an internode no greater than 18" and shall be uniformly well shaped. All plant sizes shall average at least the middle of the range for the species. Plants shall be planted with the root ball or roots fully extended so that the soil level is 2" below the top of the root ball at time of planting. Set plumb and straight, and shall be staked at the time of planting. Backfill shall be compacted earthless, 1/3 of earth ball. Remove burlap from top. (3 required)

4. Excavation
   Specifications for挖掘 soil shall be in accordance with the specifications. All staking shall be number 2 rebar, 18" below tree pit. Setting bed (compacted) 1/3 of earth ball. Remove burlap from top. (3 required)

5. SOIL MIX
   Soil mix shall consist of approximately 50% topsoil, 25% sand, 25% organic material. Soil mix shall be uniformly well shaped. All plant sizes shall average at least the middle of the range for the species. Evergreen trees are to have an internode no greater than 18" and shall be uniformly well shaped. All plant sizes shall average at least the middle of the range for the species. Plants shall be planted with the root ball or roots fully extended so that the soil level is 2" below the top of the root ball at time of planting. Set plumb and straight, and shall be staked at the time of planting. Backfill shall be compacted earthless, 1/3 of earth ball. Remove burlap from top. (3 required)

6. PLANTING
   Plants shall be planted with the root ball or roots fully extended so that the soil level is 2" below the top of the root ball at time of planting. Set plumb and straight, and shall be staked at the time of planting. Backfill shall be compacted earthless, 1/3 of earth ball. Remove burlap from top. (3 required)

7. Maintenance
   Maintenance of plants after planting shall include spraying, restocking and cleaning up and by performing all other necessary operations of care for promotion of good plant growth so that all work is in satisfactory condition at time of acceptance, at no additional cost to the Owner. The Contractor will be responsible for the removal of tree guying prior to release from the guarantee period. All plants except viney ground covers or other containers removed puncture to allow root growth. Remove collar from fiber pot & nursery field grown grade. Shrubs shall bear same relation to the availability of the required plant material as specified on the Plant Materials List. Substitution shall not be made without the written approval of the Landscape Design. The Contractor shall furnish and plant all plants required to complete the work shown on the drawings. All plants shall be properly marked for identification.
